

# CENTRAL ELECTRIC POWER ASSOCIATION

*A tradition of dependable, hometown service since 1937.*

**107 E. Main Street  
Carthage, MS 39051**

Carthage: 601-267-5671 • Philadelphia: 601-656-2601  
Rankin: 601-829-1201 • Sebastopol: 601-625-7422

## Central Electric Power Association's ongoing substation improvements

Great milestones have been reached in Attala and Neshoba County.

The Kosciusko Substation, serving members in Attala County, was built in 1973. On April 30, 2020, upgrades were completed and the substation was energized at 161 kV.

Longino Substation was built in 1978. On August 11, 2020, the substation was energized at 161 kV. Additional upgrades will be completed by the end of this year.

Sandtown Substation is currently being constructed and will be energized later this year. Both the Longino and Sandtown Substations serve members in northern Neshoba County.

All these improvements will increase the reliability and service quality to the members they serve.

These new 161/25 kV substations have the capacity to serve many years of residential, commercial, and industrial growth.

Kosciusko Substation serves members in Attala County.

**All these improvements will increase the reliability and service quality to the members they serve.**

This substation will serve members in northern Neshoba County.

Longino Substation

## ELECTRICAL SAFETY TIPS FOR HUNTERS

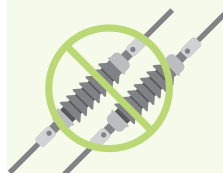

This hunting season, we encourage all members to be aware of electrical equipment and take necessary precautions while hunting. Keep these safety tips in mind as you enjoy the great outdoors.

**Take notice** of posted warning signs and keep clear of electrical equipment.

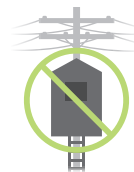

**Be especially careful** in wooded areas where power lines may not be as visible.

**Do not** shoot at or near power lines or insulators.

**Know** where power lines and equipment are located on the land where you hunt.

**Do not** place deer stands on utility poles or climb poles. Energized lines and equipment can conduct electricity to anyone who comes in contact with them, causing shock or electrocution.

**Do not** place decoys on power lines or other utility equipment. Any non-electrical equipment attached to a pole can pose an obstruction and serious hazards to our line crews.

# NATIONAL VOTER REGISTRATION DAY

## September 22, 2020

## ENERGY EFFICIENCY

### Tip of the month

Clothes dryers make up a large portion of your appliance energy consumption. Clean the lint filter after each cycle, and scrub the filter with a toothbrush once a month to remove film and increase air circulation.
